Our Services

At Safetymaps, we offer a comprehensive, end-to-end solution for emergency graphics and fire safety compliance documentation. Emergency Planning consultation. Partnering closely with each client, we deliver tailored, Australian Standards - compliant solutions designed to meet the unique demands of your project.

Our expert services include:

- Hydrant Block Plans
- Alarm Zone Plans
- Evacuation Diagrams
- Emergency Procedures Guides
- Fire Protection System CAD Drawings
- Emergency Control Organisation Documentation
- Site Audits
- Consultancy

Using architectural plans — we design and produce customised documentation to your exact specifications, including size, framing, and finish options. Our dedicated Emergency Planning Division manages every aspect from technical design through production, compliance assurance, and staff collaboration, ensuring the final product integrates seamlessly with your safety strategy.

Every project receives meticulous attention to detail, with quality controlled in-house to guarantee outstanding results that support a safe and compliant workplace environment.

All delivered quickly and to the relevant Australian Standard.

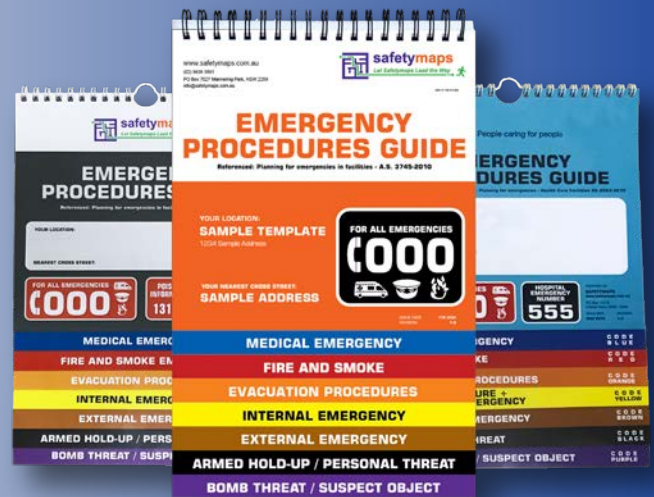

Fire Protection CAD services

Our specialist Fire Protection CAD services deliver precise, customised Hydrant Block Plans, Detection Zone Plans, and Tactical Fire Plans designed to Australian Standards. These expertly crafted plans clearly identify hydrant locations, alarm and detection zones, and critical tactical information to support emergency responders and site safety teams. Developed using architectural drawings, each plan is quality controlled in-house and available in tailored sizes and finishes, ensuring seamless integration into your fire safety and emergency management systems.

Flip Charts and Handouts

Available in a range of sizes and formats which comply with Australian standards AS3745 - Planning for Emergencies in Facilities, Safetymaps Flipcharts and materials, are excellent guides and evacuation tools for staff and visitors, when an emergency situation occurs

3-month warranty on ALL Safetymaps services

Site Maps

Site Maps diagrams are used in large scale public spaces to locate various tenancies, occupancies, facilities and departments. Locality guides in Shopping Centres, Hospitals, Institutions and Complex Buildings utilize Way Signage diagrams to inform their occupants of location, traffic flow, accessibility and to allow visitors to quickly identify where they are.

Consultancy

As expert emergency planning consultants, we guide organisations through the complexities of emergency preparedness and compliance. Our experienced team collaborates with you to develop, implement, and maintain effective emergency management strategies tailored to your site and industry requirements.

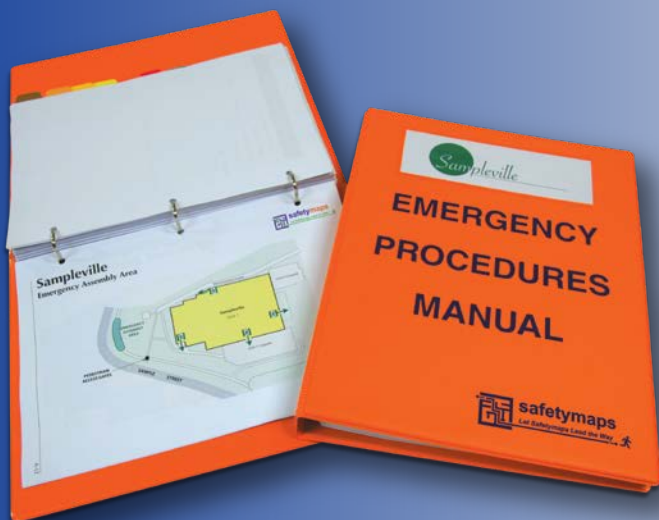

From risk assessments and emergency control organisation structures to compliance reviews, we provide practical, insightful advice to help your workplace stay safe, confident, and fully compliant with Australian standards.

Partner with Safetymaps for trusted consultancy that ensures your emergency planning is comprehensive, up to date, and tailored for real-world effectiveness.

Emergency Procedures Manuals

Safetymaps' AS3745 compliant Emergency Procedures Manuals provide clear, comprehensive, and site-specific guidance to ensure your workplace is prepared for any emergency. Developed in accordance with Australian Standard AS3745-2010, these manuals deliver practical procedures that empower employees and emergency control personnel to respond quickly and confidently, helping to protect lives, property, and business continuity. Designed for easy usability and regulatory compliance, Safetymaps' manuals are an essential tool for workplace safety and emergency readiness.
